Our mission at ANI is to promote and support collaborative business R&D and innovation, both in the country and through international networks. Collaboration is in our DNA, as the way to unmistakably promote our Economy’s competitiveness in global markets.

ANI runs a series of funding programmes and an excellent tax incentive scheme that is much liked by industry. ANI also provides support services for capacity-building and knowledge valorization of the Portuguese innovation system. We also promote and support the participation of Portuguese researchers and institutions in the European R&I Framework Programmes (Horizon 2020 and Horizon Europe), Eureka and other European networks and initiatives, and we are in charge of coordinating and monitoring the national Smart Specialisation Strategy as well as producing the national innovation indicators that we make available interactively in our website.

We joined TAFTIE in 2016 and we view TAFTIE as a source of best practices from our peers all over Europe and from its international partners, with a view to improving our performance and intervention at the service of Portuguese innovators. We also expect to capitalise on TAFTIE’s membership as a quality label for designing and joining common initiatives with the European Commission and other international organisations.

We thank our TAFTIE partners for trusting us to Chair the Association in 2020, a turning point in the innovation support landscape as the new European Innovation Council is being implemented, with undoubted impacts on the operation of the European Innovation Agencies. We aim at facilitating these changes for all TAFTIE Agencies during 2020, Building Bridges for the Future.

Thus, in our Presidency, we shall make every effort to enable TAFTIE to meet the challenges in support of what their member agencies require, following upon the excellent efforts initiated by the previous Luxinovation Presidency, and in close dialogue with the following Slovak Presidency. We shall try to bring along all our fellow TAFTIE members to jointly reinforce the internal cooperation within the Network and with our International Partners, by exploring new ways of working together and of fostering innovation ecosystems, and to better define TAFTIE's outreach goals and future activities. These are our main priorities for leading TAFTIE during 2020, towards an active forum of capable and involved innovation agencies in Europe, and I am sure that we will be able to count on the full engagement of all our partners in these undertakings!

Eduardo Maldonado
TAFTIE IN FOUR PARAGRAPHS

TAFTIE is the European association of leading national innovation agencies. Founded in 1992, it currently joins together 31 organisations from 28 European countries.

The association promotes exchange of best practices and identification of common interests and priorities among its members, for an improved implementation of national research & development and innovation (R&D&I) programmes, for the benefit of both their governments and beneficiaries.

It also enables them to collaborate at the European level by providing a valued forum that stimulates and promotes cooperation between members that want to tackle common challenges on R&D and innovation policies.

Every year, a TAFTIE member assumes the Presidency of the association. In 2020, it is up to ANI – the Portuguese National Innovation Agency, to manage the association’s activities and events and continue promoting the collaboration between its members.

Key priorities of the Portuguese Chairmanship

During Portugal’s TAFTIE Chairmanship in 2020, ANI will do its best to take the network forward, following upon the path laid out by the previous Chairmanships.

Our Chairmanship will focus on 4 key priorities, which will serve as the basis for the organisation of the planned events, internal meetings and overall management of TAFTIE throughout the year:

- Promote internal cooperation between TAFTIE agencies
- Explore new ways for TAFTIE to cooperate internationally (incl. a stronger engagement and dialogue with our International Partners)
- Clarify TAFTIE’s outreach objectives (incl. the relationship with other stakeholders, especially with the European Commission)
- Contribute to the development of innovation ecosystems with a better definition of the roles of innovation agencies

These 4 priorities embody 2 main goals:

- Take the process of discussing and developing a medium/long-term strategy for TAFTIE forward (based on the dialogue that started in 2019)
- Knowledge capitalisation along the 5 events, to consolidate ideas for TAFTIE’s future activities
