Think innovative!
Laying the foundation for a successful Innovation Partnership

1st December 2020
Webinar organised by GROW G - Public Procurement
Before we begin……Housekeeping rules

• The session is available through webstreaming only. Please note that there is a slight delay of 45 seconds for the latter

• To submit questions or comments, please use slido.com #2WIP

  When writing your question, please write ‘@the name to whom you address your question + the question’ (e.g. @Paul + What is Innovation Partnership?). We will read your questions and invite the corresponding speaker to answer

• Time flies fast, therefore we will be rigorous on timekeeping

• All questions that remain unanswered during the sessions will be collected and answered afterwards through the LinkedIn Group "Agents of innovation procurement"
Today’s speakers
HOSTED BY

Ivo LOCATELLI,
Senior Expert, DG GROW (Innovative and Digital Procurement unit)
European Commission

SPEAKERS

Hannu Latva-Rasku
Procurement Preacher, Partner at Industryhack
Finland

Rudolf Pekar
Partner at Fellner Wrezfeld & Partner Rechtsanwälte GmbH
Austria

Gert-Jan ten Hoor
Consultant and process manager for social services, CNB

“From the negotiation to the execution of the innovation Partnership” (How to negotiate the key elements of the partnership? Managing the supplier during the execution of the partnership)

A closing podcast: "What Next?" - Interview with an entrepreneur
A few words to get started!
The Innovation Partnership according to the Directive

☑ Addresses a “…need for an innovative product, service or works that cannot be met by purchasing products, services or works already available on the market” (Art. 31(1) Directive 2014/24/EU, Art. 49(1) Directive 2014/25/EU)

☑ Innovation may entail R&D or not
The Innovation Partnership according to the Directive

✓ Covers both development & delivery of innovation (no need of 2 separate procedures)

✓ Development of innovation during contract execution
Innovation Partnerships.

Innovation. | Realisation.

Key Legal Issues | Preparation Phase
European Commission | DG Internal Market, Industry, Entrepreneurship and SMEs
December 1st 2020
Under the lead of fwp partner Rudolf Pekar, Fellner Wratzfeld & Partner Rechtsanwälte GmbH (fwp) advised Bundesimmobiliengesellschaft m.b.H. (BIG) in connection with the structuring and procurement of one of the first Innovation Partnerships in Austria.

Innovation Partnerships were introduced in 2018 as a new kind of procurement procedure; what sets them apart is that once the actual procurement procedure for commissioning a contract partner is completed, innovative services are developed together with one or more partners to be purchased directly by the contracting authority without the need to conduct a new procurement procedure.

The goal of the Innovation Partnership fwp designed and conducted for BIG was to create an innovative electronic administration tool for the object and facility management department of BIG with a view to ensuring better connecting between the different levels of stakeholders. In addition, a key aspect of this Innovation Partnership was the joint further development of functionalities and the potential joint distribution of the developed software to third parties in a joint venture.

In working on this – so far unique in Austria – project, fwp was responsible for structuring and executing the procurement procedure as well as for preparing the complex contract documentation, i.e. the agreement on the Innovation Partnership, software development and the joint venture.
Overview.

Preparation Phase | Milestones.

Permissibility

- Preliminary Market Consultation
- Estimated Value
- Performance Levels & Maximum Costs
- Intellectual Property

Documentation | Procurement Documents

Partnership Contract

Tender Invitation

© fwp – Fellner Wratzfeld & Partner Rechtsanwälte
Preliminary Market Consultation.

- **Why?**
  - *IP only permissible* if based on need for an innovative product, service or works *not already available on the market*
  - Preparing procurement and informing potential bidders (e.g. determination of estimated procurement value, maximum costs etc)

- **Who?** e.g. independent experts, public authorities or market participants

- **How? Market research | contact of potential tenderers | public notification / calls**
  - No violation of principles of non-discrimination and transparency
  - No compensation for advice (possible service contract)
Estimated Value.

- **What?** Maximum estimated value net of VAT of *research and development activities during all stages* as well as *supplies, services or works to be developed and procured* at the end of the partnership.
  - Estimated value may *not* correspond to budget
  - Conflict between internal budget requirements and anticipatory procurement strategy
  - Consideration of the agreed maximum cost limit

- **How?**
  - **Comparison of costs** for similar goods/services and rates
  - Prior bidder involvement | market consultation
  - **Documentation** of calculation is key (e.g. stages, duration, milestones, calculation bases, assumptions for calculation)
Performance Levels and Costs.

- **What?**
  - Development and purchase of innovative goods/services require **compliance to specified performance levels and maximum costs**
  - Performance level = quality of the development | maximum costs = cost ceiling for the development

- **How?**
  - Variations for maximum costs: e.g. **goal price agreement** | **adjustment clause** for the cost ceiling | **fixed unit price**, depending on the authority’s future requirements for use
  - Performance Levels: often corresponding to minimum requirements/intermediate targets | specify clear milestones in development phase

- **Consequence of non-compliance?**
  - **No subsequent purchase** of developed goods/services (only via new tender)
Intellectual Property.

▪ What?
  – Determination of use of intellectual property rights arising from Innovation Partnership
  – No sharing of solutions with other partners without prior consent

▪ How?
  – Variations for use of rights: e.g. remain exclusively with the partner | transfer to contracting authority | shared rights between partner and contracting authority / variation: use in joint-venture
  – Structure of IP rights essential for market pull | shared IP or transfer of rights to contracting authority may deter potential participants (often IP highest asset)

Lessons from seven innovation partnerships: Challenge Definition and Participant Selection

The second EU webinar on the Innovation Partnership
OUR MISSION

We help people solve big challenges together.
Forerunner in cross-organizational co-creation

Since 2015 we have helped public organizations and large corporations (e.g. Helsinki, Aalto University, Finnish Tax Administration, Stora Enso, UPM, Nokia, Airbus) solve their challenges with co-creation and our network of solvers

- 80+ Innovation Challenges
- 1100+ Teams applied to challenges
- 500+ Solution concepts
- 100+ Proof-of-Concept projects
- 40+ Continued collaborations
Think about what is the best way to accomplish the result you are hoping for, not just what must be done from legal point of view.
Innovation Partnership = Open Innovation

Not just buying innovations, but *innovating together with* partners, because

➔ Not all the best knowledge and skills are in your own organization

➔ You best know the challenges you are facing, and you are looking for partners who could figure out a solution

➔ Trust and genuine dialogue between parties leads to speed, quality and effectiveness
INNOVATION VOCABULARY

What is a Challenge?

Challenge is the problem, situation or opportunity your organization is facing and which you are looking to improve.
Your challenge is their opportunity

Call for Applications (CFA) is the combination of your challenge and the suppliers’ business opportunity.

➔ Which goal or purpose the solutions should contribute to?
➔ What kind of social, technological or economic impact are you trying to achieve?
➔ What kinds of expectations or limitations do you have for the possible solutions?
➔ What is the business opportunity you are offering for the suppliers?
➔ How is the co-creation organized, what is expected of the parties during the process?
Co-creation

Co-creation is a goal-oriented and prejudice free way of working, which emphasizes learning together. Trust between participants, equality and open interaction are its cornerstones.

➔ uses carefully defined challenge or opportunity
➔ has facilitation and fair rules of engagement
➔ requires commitment and activeness
➔ needs an open mind for learning and new approaches
Anatomy of a Winner - Participant Selection
Anatomy of a Winner (1)

Participant selection is based on the team each company offers for the co-creation

1. Ability to create innovations and concepts related to the subject
   a. Measured with 5000 letters long written presentation, where usually only the best three get awarded points based on **innovativeness, scalability and experimentality** of their three preliminary ideas
   b. We are looking for ability to create relevant, but innovative ideas as we believe this to be the most important ability during the R&D and implementation phases
Anatomy of a Winner (2)

Participant selection is based on the team each company offers for the co-creation

2. Wide range of complementary skills (at high level and current)
   
a. Measured by teams combined competence in 4 to 6 key fields chosen based on the Call for Applications
   
b. We are looking for ability to understand different points of view and ability to find new opportunities related to the challenge
   
c. Criteria is set at such a high level that usually none of the teams are able to get full points.
Anatomy of a Winner (3)

Participant selection is based on the team each company offers for the co-creation.

3. Team has an established way of working together
   a. Measured by team members having previous experience in working together
   b. We are looking for teams that can start working together right away and that already know they will get along for a long time as these projects often last a long time
Think about what is the best way to accomplish the result you are hoping for, not just what must be done from legal point of view.
A good way forward

You have at least these two options:

➔ Decide that you will outsource this kind of work to someone like us and hold a tendering so you have a general agreement when you need this kind of services.

OR

➔ Start building your own capabilities by doing innovation partnerships yourself or maybe preferably hiring someone to help you at first.

municipality, schools and 
childcare functions

Clemens Volker
Projectmanager municipality Hof van Twente, department real estate
Green dream Hof van Twente
global overview

- Two childcare centres with Childcare, Care and Education for ages 0-14 years in Delden (2.200m2 GFA) and 0-12 years in Markelo (2.700m2 GFA);

- Research started in 2017 and market consultation at March 30, 2017 on first European Innovation Partnership on construction of schools;

- Summer of 2017 start tender process with one A4 Key Performance Indicators: Smart, Simple and Science;

- Tender contract Research and Development phase at February 2018;

- Go decision on innovations, final design and budget at January 29, 2019; Contract for realisation phase.

- IKC Delden in use at May 2020 en KC Markelo in use December 2020;
Procurement proces

- Integrated contract with contractor, architect and installer;
- From 15 accepted candidates to 3 tenderers;
- Selection based on cooperation orientation en innovation skills, no design: saves costs and focus on cocreation;
- Inspiration day with 3 tenderers on University of Twente with Novel T (start-ups accelerator);
- Two Workshop sessions with tenderers;
- Winner: Klaassen groep contractor with installer Rouweler and RoosRos architects;
- Integrated but phased Contract;
  - Research and Development phase;
  - Demolition/reuse and construction phase
  - Maintenance and operate phase.
Research and Development phase
Dutch start-up Sound Energy

Research and development phase:
• Researched multiple innovations such as: Cellulose, pavatex isolation, Sound Energy, Phase Changing Materials, straw block systems, dual current, jeans on the wall, infrared panels;
• Integrate individual innovations with total building engineering Solutions.

Sound Energy as proof of concept integrated:
• Global Warming Potential score of 1 for heating and cooling;
• In comparison standard airco has GWP index of 2000;
• The more sunshine, the more cooling available (simultaneity);

Integraal Kindcentrum Delden: Energie & Duurzaamheid
Quality: Fresh school, highest class A

Class A on energy, air quality and thermal comfort
Quality: GPR score IKC Magenta
SOUND ENERGY SYSTEM
Interactive proces with users
Interactive proces with users: from waste to pencil
Climate Adaptive, natural playground, bio diversity
Biobased and circular materials, such as pavatex and jeans on the wall
Standarisation, disassembly for future use
Energy roof, zero emission building
Financial key figures m2 GFA

- Two projects within budget local council;
- Two projects realised start summer 2017 to end 2020, within 2.5 years (some delay due to Corona measures);
- Installation and construction contract € 1.650,- excl. VAT per m2 GFA;
- All additional costs included total € 2.450 per m2 GFA incl. VAT;
- Separate innovation budget, € 100,- per m2 bvo excl. VAT;
- Co investment by schools (Dutch legislation municipality responsible for new buildings and schools for maintenance and operate)
